

ANTI-BULLYING CAMPAIGN
Break Through the Cloud of Bullying

From a non-English-speaking country? Can you help provide translations of some of our resources into other languages?

October 10, 2022

As a voluntary organisation with no financial resources we would like to have our cost-free written anti-bullying resources for schools translated into other languages besides English so more children in more countries can benefit. Already, all our written cost-free resources have been translated into Irish language (Gaeilge) - with Irish Department of Education funding - so about 200 Irish language schools could avail of our free resources. Is there such a service in your country? If so, the benefit would be much bigger since there are so many more schools. If such a service is available in your country please email us with the details so we can check this out.

If there is no such service available in your country there may be another way to achieve this goal. If each teacher from your country who visits our website and sees this notice were to volunteer to translate one written resource-page into your language and emailed it to us we could include it instead of the English language version on the relevant website page. If you would like to try this, as an international cooperative endeavour, please email antibullyingcampaignforschools@gmail.com to let us know.

For non-English speaking countries we would also like to replace our English language videos and associated question pages with videos presented or subtitled in your language and matching question pages. If you know of an anti-bullying video presented or subtitled in your language, that is in the public domain already (for example on YouTube), that is similar in content/message to one of our English language videos and could be used to replace it, would you please email the details of that video and the English language video it could replace - to us, so we can check it out, at antibullyingcampaignforschools@gmail.com . If you would also be able to prepare a page of appropriate questions in your language for children to answer after watching the video please let us know. That would be very helpful. Thank you!
